

The BIANCHE VALLATE breeding finds itself dipped in the Emiliana campaign close to the center of Carpi (Mo). It is comprised of a green area of 10.000 squared meters for the animals, isolated kennels of last generation with a thermal excursion of $\pm 10^{\circ}\text{C}$ that guarantee the ideal temperature during all the year, an ample puppy nursery equipped to accommodate at the same time up to six litters in total confort. Every single dog is accurately followed under every aspect, from the feeding (very important) to the movement - obviously all the cures necessary veterinaries and of routine. Even if the aspects that characterize this breeding are the passion for the race and decennial acquired experience directly in breeding that through the personal relationships it consolidates in the several time with breeders is JAPAN KENNEL CLUB and OZONKAY, known during the travels in Japan and conferences JAPAN KENNEL CLUB to which Mr. Bordone have participated like representative for Italy.
